

We will be running a volunteer session to help clear the vegetation covering the 'garden' area behind the Stud buildings and reveal whatever there is beneath!

There'll be a fire to burn stuff and to gather round. Plus kettles for hot drinks and jugs for elderflower cordial. Also plenty of flapjack to keep us going too. Though do bring snacks or lunch if desired.

There'll definitely be something for everyone to do and we'll bring plenty of tools and PPE. If you have your own gloves and useful tools, please do bring them too.

This is an opportunity to work together and get to know the space and stud buildings. It's also a time to chat and share ideas about the future.
